

Marek P. Ehrlich, MD is a native of Austria, and studied medicine at the University of Vienna. He completed his medical training as a resident in general surgery and cardiac surgery at the University Hospital in Vienna and also held a fellowship as a postdoctoral chief research fellow at the Mount Sinai Hospital in New York. Dr. Ehrlich is currently an Associate Professor of Cardiac Surgery, attending physician and Director of the Aortic Program at the University of Vienna.

His surgical portfolio involves a full spectrum of cardiac as well as vascular procedures including thoracoabdominal repair and minimal invasive valve repair and replacements. He is also performing all sorts of ablation procedures for atrial fibrillation.

His total number of surgical operations exceeds 2000 cases including electrophysiological interventions such as pacemaker und defibrillator implantations.

Dr. Ehrlich's research interests have included experimental studies concerning cerebral protection in an animal model. His current research interests include surgical as well as endovascular stenting of the aortic arch, the clinical use of an antegrade stent-graft device for acute type A dissections and animal models for spinal cord protection. Moreover, Dr. Ehrlich has served as a faculty member in several international symposia, is a reviewer of the Journal of Thoracic and Cardiovascular Surgery, Circulation and the Annals of Thoracic Surgery.

Furthermore, he is the organizer of the "VISAR" symposium which takes place biannually in Vienna.

Dr. Ehrlich is the author and coauthor of over 300 articles, abstracts and book chapters published in leading scientific journals.
