Brain Tumors, BCI

Third Conference of Hong Kong & Shanghai Brain Consortium (HSBC-3)

This is an in-person conference on brain tumors as well as BCI and is the third conference of Hong Kong Shanghai Brain Consortium (HSBC).

Topics include all research, diagnostic and clinical topics of brain tumors and frontiers of BCI (Brain Computer Interface).

Brain tumor conferences are always multi-disciplinary. Presenters and participants will include neurosurgeons, oncologists, pathologists, pediatricians, radiologists and scientists.

There will be keynote lectures, symposia and workshops. There will be opportunities for free paper and poster presentations. This is an excellent opportunity to be updated of the international trends, meet the experts face-to-face at informal, practical sessions, make friends and connect, as well as enjoy the wonderful city of Shanghai.

Call for oral and poster abstracts will be posted in December.

Keynote speakers
(Alphabetical)
