

Dr. Takuya Fujikawa received medical training from Medical school of Tohoku university, Japan.

He undertook higher surgical training in cardiothoracic surgery in Yamagata Prefectural Central Hospital, Tohoku-Kouseinenkin Hospital, Kawasaki Aortic Center.

Dr. Fujikawa's career interest focuses around open aortic surgery. He has been a staff surgeon of Kawasaki Aortic Center since 2011. Kawasaki Aortic Center is one of the highest volume aortic center in Japan which around 500 cases of open thoracic and thoraco-abdominal surgery were performed per year, including more than 120 cases of acute type A dissection. Dr Fujikawa has performed over 300 cases of open aortic surgery and supervised more than 300 cases of complex aortic surgeries to his junior trainee.

Dr. Fujikawa joined to Department of Surgery, Prince of Wales Hospital in Hong Kong as an Assistant Professor since February 2017 and is committed to expand the horizon of complex open aortic surgery in Hong Kong. He is actively involved in training of open aortic surgery in Prince of Wales Hospital, development of post-operative protocol for open descending aortic replacement and instrumental to decision making in Aortic Multidisciplinary Team monthly meeting.

Dr Fujikawa is currently member of Cardiothoracic Surgery Board of Japan, European Association of Cardio-Thoracic Society and Society of Thoracic Surgeons. He has presented in various National and International meetings including JSVS, Aortic Lives, TSVS, ASCVTS, EACTS and Aortic Symposium of AATS.

Takuya Fujikawa, M.D.
